

ADPICS 2117 REQUEST TO CONTRACT FOR PERSONAL SERVICES

There were two problems with the ADPICS 2117 Request To Contract For Personal Services screen. Users were able to make changes to a saved document, enter 'P' in the action indicator field, then F10 twice to post the document. This would result in the document posting and not going through an approval path. This problem has been corrected. The action indicator will now revert back to 'N' and the change will revert back to its original entry. The following error message will be received: E479 - CS 138 cannot be posted if other changes have been made to the record.

The second problem occurred when a user linked from another document, such as a Requisition, to the ADPICS 2117 Request To Contract For Personal Services screen. The linked document number would appear in the 'CS138 ID' field and the user would be unable to generate a new CS-138 document. The Notepad indicator would also show a 'Y' if the linked document had a Notepad. This problem has been corrected.

The software will be available to the users May 28, 1998.
